Version	Date	Notes	Document Name
	16 March 2006	1st Release	16.03.06-Ford Phone Compatibility Chart
0.0	16 March 2006	1. Introduction of a Version Number 00. 2. Change of the signature in the footnote.	16.03.06-Ford Phone Compatibility Chart_Version 00
1.0	19 April 2006	1. Introduction of this history table. 2. Misspelling: MotoroCRa -> Motorola. 3. Wrong information in FINIS code table: Siemens S55, M55, C55 (Only for PREMIUM system kit C) and Siemens S65, SP65, M65, CX65 (Not released for S-Max, new Galaxy, new Transit). 4. Wrong information. Sony Ericsson V800 is still a not recommended phone! Pending outstanding test results! 5. Add the tested SW version of the mobile phones. 6. According to the legal department Ford is not allowed to show images of the mobile phones on the compatibility list. Therefore the images are removed. Please don't distribute an old version of the compatibility chart. 7. Add some more comments / restrictions for the Siemens 55, 65 family.	19.04.06-Ford Phone Compatibility Chart_Version 1.0
2.0	02 May 2006	1. Pre-Release Version 2.0 Add the introduction -> more details regarding the different hands-free kits.	02.05.06-Ford Phone Compatibility Chart_Version 2.0
2.1	12 May 2006	1. Pre-Release Version 2.1 with the images of Nokia mobile phones.	12.05.06-Ford Phone Compatibility Chart_Version 2.1
2.2	17 May 2006	1. Final Release Version 2.2 same additional comments in the compatibility chart. Only cradle phones are highlighted under Kit C, all Bluetooth® phones are listed under Kit B. 2. Add some more comments / restrictions for Siemens, Sony Ericsson and Motorola phones.	17.05.06-Ford Phone Compatibility Chart_Version 2.2

Cradle Part Number & FINIS Code

Cradle ID	FINIS Code	Part Number	Supported Mobile Phones

CR8	1374352	4M5T-19A464-CB	Siemens S55, M55, C55 (Only for PREMIUM system kit C)
CR9	1338931	4M5T-19A464-DA	Sony Ericsson T610, T630 (Only for PREMIUM system kit C)
CR24	1374347	5M5T-19A464-AA	Nokia 3100, 6100, 6230, 6230i, 6610, 6610i, 6820, 6822, 7210, 7250, 7250i
CR32	1374350	5M5T-19A464-CA	Siemens S65, SP65, M65, CX65 (Not released for the Portuguese market in combination with Blaupunkt Navigation and in general not released for S-Max, Galaxy and Transit)
CR33	1374351	5M5T-19A464-DA	Sony Ericsson K700i
CR38	1374349	5M5T-19A464-BA	Nokia 3220, 6020, 6021
CR40	1374353	5M5T-19A464-EA	Nokia 6310, 6310i (Only for PREMIUM system kit C, Phone must be connected via Bluetooth®)

Introduction

Three Hands-Free Kits are available:

- Kit A: Hands-Free Base Version (**with cradle system / without Bluetooth® & Voice Recognition**) which allows the integration of a users personal mobile phone device into the In-vehicle environment. The mobile phone to vehicle interface is a physical connection with the help of a mobile phone specific adaptor cradle, which is attached to a baseplate. Battery charging and external GSM antenna connection are supported by the specific adaptor cradle. On this entry level Hands-Free kit A **no internal echo cancellation is installed**, therefore it's necessary that the mobile phone has to use its own echo cancellation. The mobile phone can be controlled via the radio or navigation system.

- Kit B: Hands-Free Advanced Version (**without cradle system / with Bluetooth® & Voice Recognition**) which allows the integration of a users personal **Bluetooth®** mobile phone device into the In-vehicle environment. The mobile phone to vehicle interface is via a wireless Bluetooth® link. This Hands-Free kit B comes with an **internal echo cancellation**. The mobile phone can then be controlled via the In-vehicle Radios, Navigation systems or Voice Commands. Voice Commands are for of the High-series Navigation system, Climate Control, Radios, and CD player/ -changer.

- Kit C: Hands-Free Premium Version (**with cradle system / with Bluetooth® & Voice Recognition**) which includes the same Bluetooth® functionalities like Kit B, but additional to that the user can also use the cradle interface. The mobile phone to Vehicle interface can be connected via a wireless Bluetooth® link, or a physical connection with the help of a mobile phone specific adaptor cradle, which is attached to a baseplate. Battery charging and external GSM antenna connection are supported by the specific adaptor cradle. This Hands-Free kit comes with an **internal echo cancellation**. The mobile phone can then be controlled via the In-vehicle Radios, Navigation systems or Voice Commands. Voice Commands are for of the High-series Navigation system, Climate Control, Radios, and CD player/ -changer.

As no common agreement exists, mobile phone manufacturers are able to implement a variety of profiles in their Bluetooth® devices. One potential consequence of this is that an incompatibility can occur between the phone and hands-free system, which in some cases may significantly degrade the system performance. To avoid this situation, only phones that appear on this list of approved devices should be used.

CRxx	Phone communication via Cradle/ Mobile Holder No. xx. Please find on page 1 (Cradle Part Number & FINIS Code) the corresponding part number and FINIS code of the regarding cradle.	Product Line-Up	Cradle Support	Bluetooth®	Voice Control	Comments
BT	Phone communication via Bluetooth®. Therefore are all recommended Bluetooth® Phones are listed on Kit B. Kit B is a subset of Kit C.	Kit A - "Base" Version	✓			Charging, external antenna, no Bluetooth®
-	Phone is not supported by the car kit	Kit B - "Advanced" Version		✓	✓	No charging or external antenna, but Bluetooth®
*	Kit C supports the same Bluetooth® phones like Kit B. No cradles for these phones are available.	Kit C - "Premium" Version	✓	✓	✓	Charging, external antenna and Bluetooth®
